

Your liaisons are working from memory.

They can name twelve homes in Mesa. Arizona has around 2,600 licensed senior living homes. The rest of the territory has open rooms, and no one has called it.

What ElderLogic is →

— AZDHS licensing & enforcement file · refreshed monthly

Each mark is one licensed home in Arizona.

Twelve marks are the homes a liaison can name.

Around 2,600 licensed homes · AZDHS, refreshed monthly

What ElderLogic is.

ElderLogic is a placement and outreach platform for hospice teams in Arizona. It runs on a database of every licensed senior living home in the state, refreshed monthly, carrying each home's licensing, inspection, violation and enforcement history as published by AZDHS.

Your team files one assessment. The search goes out the same day and returns every licensed home in the radius. Then our staff read the state record on each one, call them, confirm who has a room for that patient, and agree a price.

Your team receives the homes that will take the patient. The platform routes the visits, records what your rep saw, and keeps a home that failed out of every future search.

Coverage	Arizona
Homes in the database	~2,600
Source	AZDHS
Refreshed	monthly
Record held	licensing, inspection, violation, enforcement
Calls and pricing	done by our staff
Works on	phone and desktop
Replaces	no EMR, no CRM

Sold as a subscription with a per-user licence. Pricing on a call.

Every licensed home in the state is already on the map.

A liaison covers the homes they remember. The map holds the ones they do not: the home two streets over with a room open this week, the home that would refer if anyone had ever walked in.

Select an area and you get every licensed home inside it, with contact details and the full published record, ordered into a route for a single day.

Phoenix metropolitan area. One pin, one licensed home.

Two hundred homes in the radius. Five you can actually use.

The narrowing is the work, and people at ElderLogic do it. We read the record, we make the calls, we agree the price. Your team does not receive two hundred phone numbers.

Open question for the client: are these figures typical, or are they one particular search? The page needs one line of provenance here before it ships.

The shortlist becomes a routed day.

Stops in order, re-ordered when the day changes. At each one: navigation, the home's answers for this client, the state record, and a short form afterwards. A home rejected after a visit stays out of every future search for everyone in your organisation.

RESERVED · WALKTHROUGH VIDEO

Six minutes of the product being used. Does not exist yet. This slot holds its place.

RESERVED · A CUSTOMER

One named hospice, one sentence, one job title. No proof point has been supplied. The layout keeps the space.

See it against your own territory.

Pick an address you work. We will show you the licensed homes inside a radius of it, and what the state has published about each one.
