

Tuesday · four stops · Mesa and Gilbert

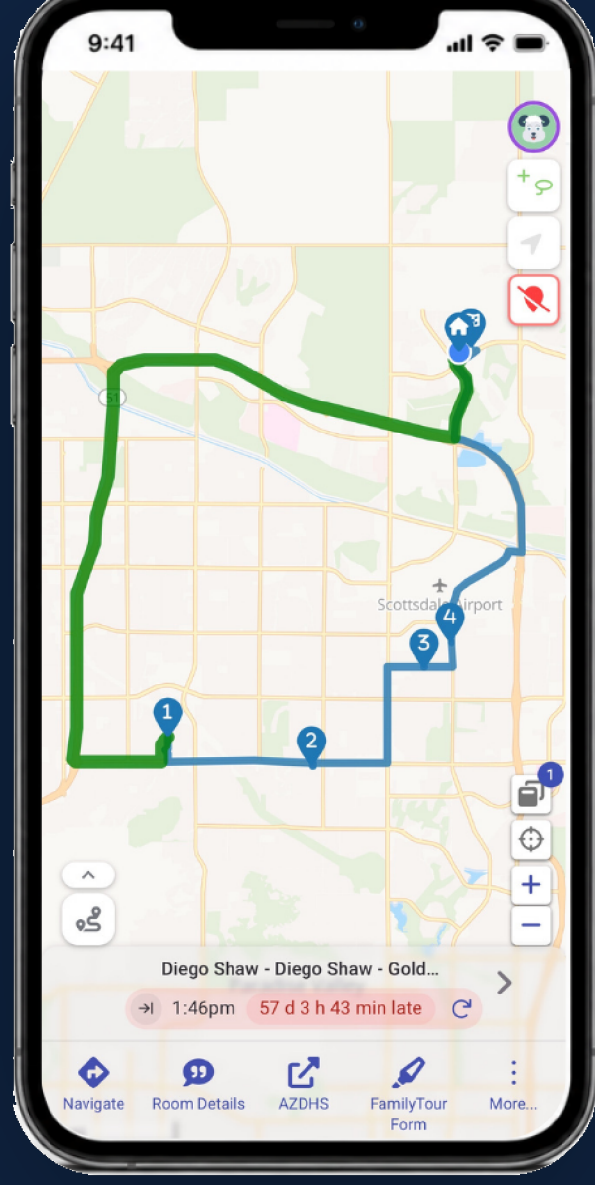

This is the whole day, in the order it happens.

STOPS IN ORDER

The visits for this client, routed. Re-ordered when the day changes.

NAVIGATE

One tap out to directions, then back to the stop.

ROOM DETAILS

What this home answered for this client's needs.

AZDHS RECORD

The published state file on the home, one tap away.

FAMILY TOUR FORM

Optional fields only. A long form never gets filled in a car park.

What ElderLogic is →

What ElderLogic is.

A placement and outreach platform for hospice teams in Arizona, running on a database of every licensed senior living home in the state. It is refreshed monthly and carries each home's licensing, inspection, violation and enforcement history as published by AZDHS. Part of the work is the software.

The calling and the negotiating are done by our staff.

01 Assessment One form creates the client record, the power of attorney record and the placement search. your team	02 Search Every licensed home inside the radius comes back, with its published state record. the platform	03 Calls We read the record on each home, call them, confirm a room and agree a price. our staff
04 Shortlist Your team receives the homes that will take this patient. our staff	05 Pre-tour The shortlist becomes a routed day on a phone, with a short form at each stop. your rep	06 Family route The same route goes to the family by text or email and opens in Google Maps. the family

A rep picks a date and an area. We warm the homes before the visit.

Every licensed home in that area comes back with contact details and its published record, ordered into a route. Before the day, we call those homes with your own placement pitch: a resident who might fit, and no placement agent fee for the home to pay.

Your rep walks into a meeting the home already wanted.

150 days

Average lifetime hospice days for a patient referred from assisted living.

87 days

Average lifetime hospice days for a patient referred from home.

Territory coverage is the input to census. Census is what an owner is measured on.

We make the calls.

One assessment creates the client record, the power of attorney record and the placement search together. Only the critical fields are required, so the search goes out the same day.

Then people at ElderLogic read the state record on each home in the radius, contact them, confirm who has a room for this patient and agree a price. Homes your team has already rejected never enter the list.

200 licensed homes in the radius

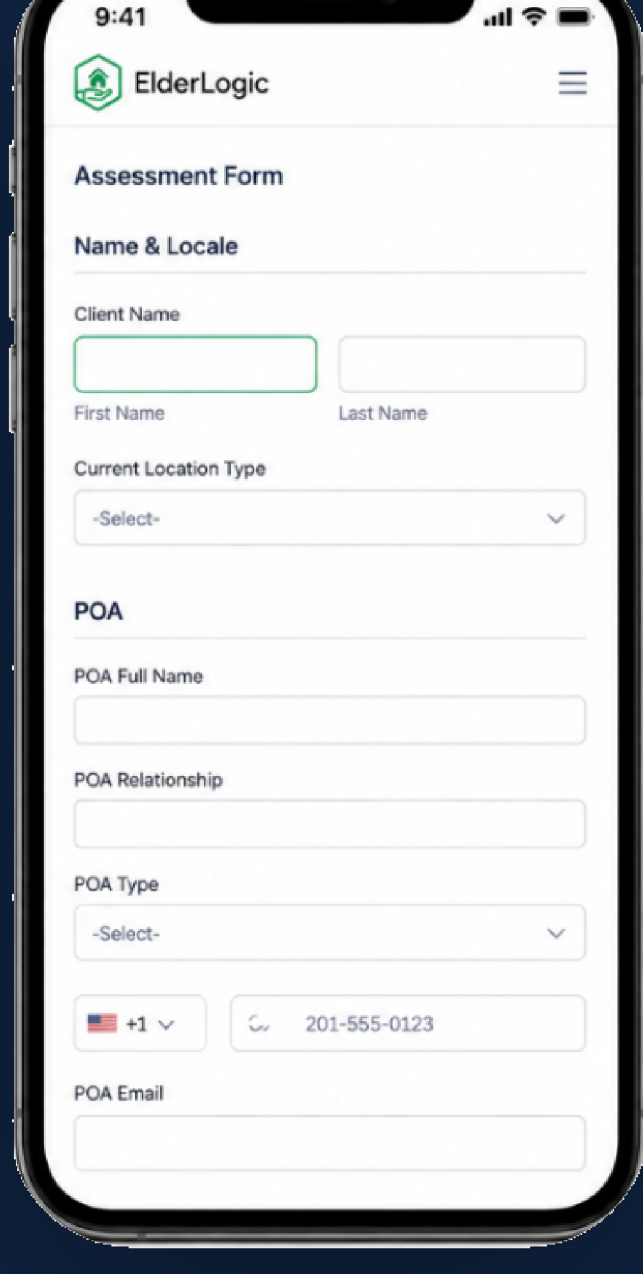

60 contacted by our team

20 replied

5 with a confirmed room and an agreed price

2 the family tours

Open question for the client: typical figures, or one particular search? A provenance line goes here before launch.

RESERVED · THE SHORTLIST

The screen a customer opens to see the five homes, with the room and the agreed price on each. No screenshot exists. Nothing has been drawn in its place.

The same route can be sent to the family.

Text or email. It opens in Google Maps and they drive the tour in the order it was planned.

Open question for the client: is the family route public, or internal only?

Walk one day with us.

Give us a date and an area your reps work. We will build the route and show you what came back.
