

PLACEMENT & TERRITORY • ARIZONA

Every licensed home in the state, and a person who calls them.

ElderLogic searches around 2,600 licensed senior living homes in Arizona. Our team screens the state record, makes the calls, and confirms who has a room at what price. Step through a placement below.

ONE PLACEMENT, STEP BY STEP

One assessment, three records

The assessment creates the client record, the power-of-attorney record and the placement search in a single pass. Only the critical fields are required, so a home can give a fast yes or no.

- Client and power-of-attorney records created together
- Critical fields only, so intake finishes in one sitting
- Submitting it fires the search across every licensed home in range

ASSESSMENT

WHAT IT IS

A placement and outreach platform for hospice teams, built on the state's own record of every licensed home in Arizona.

WHO DOES THE WORK

Our team screens, calls and negotiates. The software routes the days and keeps the records.

WHERE IT FITS

Alongside your EMR and CRM, not in place of either. Works on a phone, including routes, home details and notes.

COVERAGE

Twelve remembered homes, or the whole territory.

12

homes a liaison names in Mesa

2,600

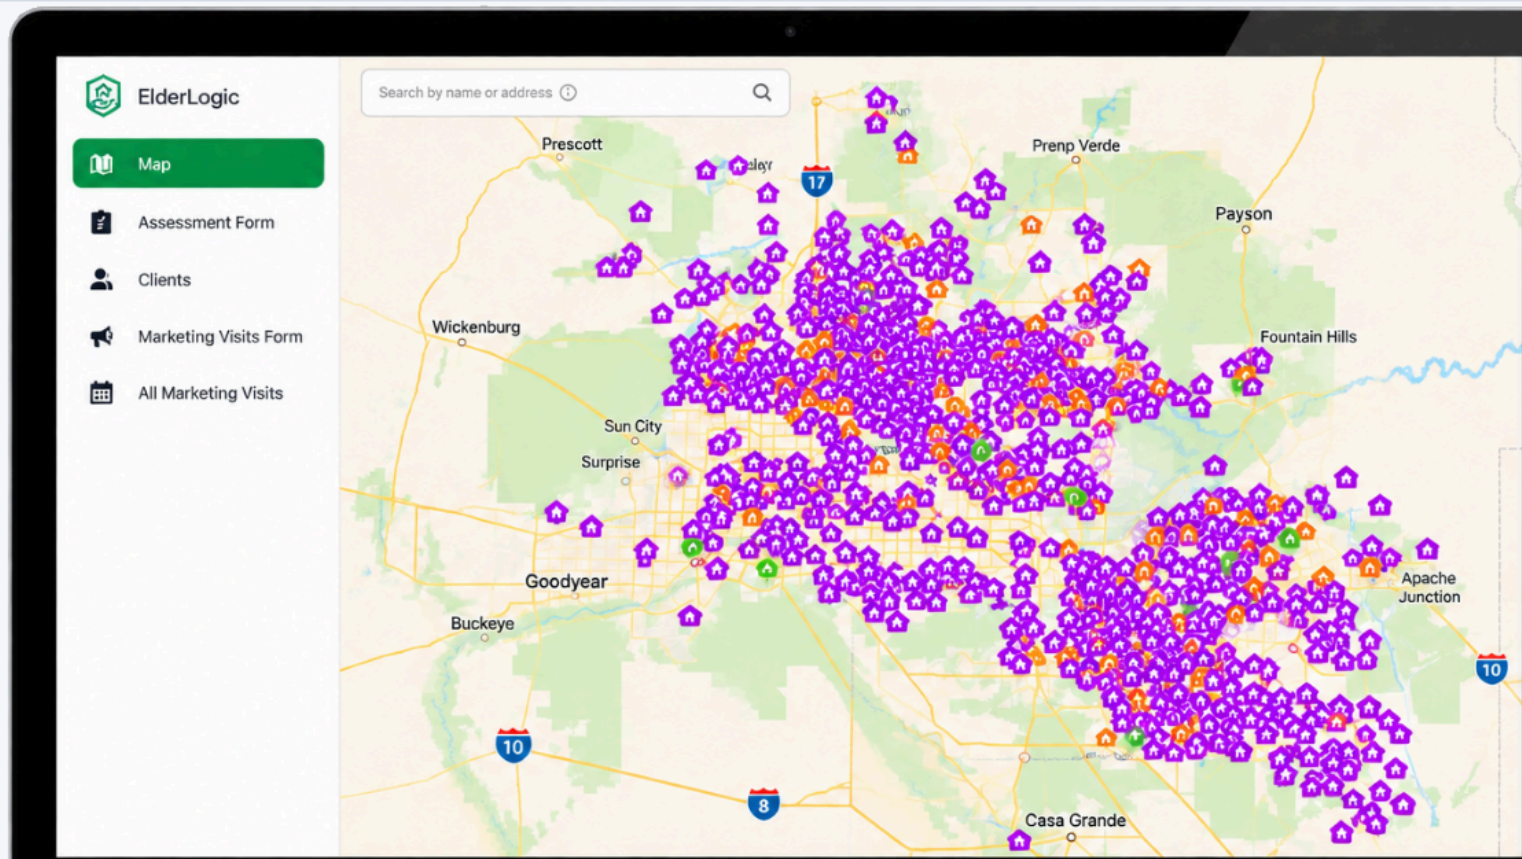

licensed homes in Arizona

Liaisons work from the homes they already know.

Everything else in the territory is invisible, including homes with open rooms and homes nobody has called. Homes decide which hospice gets the call when a resident starts declining, so a liaison can only build that relationship with homes they know exist.

Select an area and every licensed home inside it comes back with contact details and history, ordered into a route. We contact those homes ahead of the visit with your placement pitch, so the rep arrives somewhere that already wants the meeting.

Patients referred from assisted living average around 150 lifetime days on hospice against around 87 from home, which is why coverage shows up in census.

LICENSED HOMES, PHOENIX METRO

AZDHS • REFRESHED MONTHLY • ~2,600 STATEWIDE AS OF AUG 2026

THE STATE RECORD

We do not tell you a home is good. We show you what the state published.

Every home carries its full AZDHS history, not only its current status. It is refreshed monthly, and one click from anywhere in the workflow opens the official state file. Your team reads it and decides.

Licensing	Full history
Inspections	Full history
Violations	Full history
Enforcement	Full history
Source document	One click to AZDHS

No scores, no ratings, no rankings. A home your team rejects after a visit is blacklisted once and stays out of every future search for everyone in the organisation.

**See it running on
your own territory.**

Twenty minutes. We open the map on the area your
liaisons cover and you can see what is in it.
